

Corrosion on Aging - Aircraft Inspection Requirements

This 3 hour safety seminar will help you understand factors that affect aging aircraft including inspection techniques that can identify corrosion before it becomes too serious to correct.

Directions: Meeting will be in the Campground Pavilion. Park in the parking lot outside the terminal building. When walking from asphalt apron to the campground, cross Runway 17/35 at windsock only. Look both ways before crossing. Aircraft may be using either Runway 17 or 35.

A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?
